07

Our roadmap

08

With a initial total supply of **100.000.000.000** tokens, PAX applies an 10% tax fee that will be subtracted from every transaction, which will be used as follows:

From this 10%

- 5% is burned to increase the value of PAX
- 5% to the holders by reinjecting into the liquidity pool.

Before launch we will also have a wallet that holds 5% of PAX'S total supply, that will exclusively be used for charity.

We know that 10% may seems like a lot, but with that 10% we make sure that the coin is going up in value over time.

If you decide to Hold PAX, you will recieve tokens just by holding. And with every transaction 5% gets burned, over time that is also going to increase the price of PAX.

PAX will continuously integrate the charity aspect into all of our intangible and tangible offerings and use cases. Going forward, our chosen charities will continue to evolve as we get more input from the community. A proper forum and voting system will be put in place.

In recent months, Non-Fungible Tokens (NFTs) have conquered the world storm. Basically, NFTs are multimedia art which is tokenized in the blockchain. An intrinsic offering we've built since PAX's inception is our community NFT Launchpad.

The PAX NFT Launchpad is a platform exchange built on the PAX ecosystem that facilitates multimedia art tokenization as well as our community's ability to trade and own these assets. This not only provides a utility aspect, but also a redeemable aspect to the PAX token. As with all offerings within the PAX ecosystem, charity is well integrated into our crypto collection platform.

The unique thing about the PAX ecosystem is that it universally benefits the speculative nature of cryptocurrency trading both inbound and outbound transactions intrinsically reflect PAX's good cause.

***“Rockets come down
again, birds keep flying!”***

We are at a crucial time in our history where traditional structures are falling apart because they are based on unsustainable principles of hierarchy and centralization of power. The recent health and economic crisis has shown the inherent weaknesses of traditional systems that were long considered table and unbreakable. As new problems arise, new solutions will surface and we at PAX believe that the cryptocurrency universe is a breeding ground for new, decentralized, innovative and community-led systems that are sure to bring coherent responses to the world's most difficult issues.

We are determined to become a global leader in bridging the needs of charitable organizations with the power of community fundraising in the crypto space. This is a lifetime project for the team and the PAX token is just the beginning of a movement.

PAX will continuously integrate the charity aspect into all of our intangible and tangible offerings and use cases. Going forward, our chosen charities will continue to evolve as we get more input from the community. A proper forum and voting system will be put in place.

As with all offerings within the PAX ecosystem, charity is well integrated into our crypto collection platform.

The unique thing about the PAX ecosystem is that it universally benefits the speculative nature of cryptocurrency trading both inbound and outbound transactions intrinsically reflect PAX's good cause. For example, an outgoing transaction contributes to the liquidity pool in which tokens are removed and allocated as proceeds to our chosen charities.

War Child is an organization that works worldwide for hundreds of thousands of children growing up in war and violence. in the future we would like to cooperate

We want to help people who suffer from war and violence. With the help of a very big crypto community our mission is to turn this into a reality!

and while helping people all around the world you will make money just by holding PAX.

Our roadmap

Q2

Bscscan verification
website design
Whitepaper
token PRESALE
Listing on Pancakeswap
1000 Holders
Tokenomics
Coingecko & Coinmarketcap listing

Q3

Social campaign
Marketing
6000 holders
Getting listed on a
exchange platform

Q4

Listing on more exchange platforms
Partnership with charitable organizations
Big international attention
15000 holders

Q1 2022

Still so much more to come! We will
consult with our holders and decide
where we go next!
